Learning Goals	<ul style="list-style-type: none">• Fix a Rails application so that the existing tests pass• Implement pending tests

Rails Rspec Challenge

Start challenge and git fork and clone from [this repo](#).

Make sure you can start the Rails application by running `bundle exec rails server`.

The objectives of this challenge are to:

1. Fix the Rails application so that the existing tests pass. Begin with model unit tests, then the controller unit tests, then integration tests.
2. Implement the tests marked as pending

RULES

1. You are not allowed to edit existing views (you ARE allowed to create new ones)
2. You are not allowed to modify existing tests, except when removing `pending` to complete the implementation

Resources

The following screencasts are HIGHLY recommended:

- <http://railscasts.com/episodes/257-request-specs-and-capybara>
- <http://railscasts.com/episodes/275-how-i-test>
