

It's time to start working on the project! You will be given a theme and assigned to a team. Typically there will be 3 - 5 students per group. The head of programme and mentors who have walked through 8 weeks with you will assign you to a team according to your strengths and interests. If you would like to change teams (please try not to though...), please discuss with us so that we can work things out together.

Your team will then brainstorm on an idea and pitch it in front of the class. You can then start planning and building your app after getting feedback from your friends and mentor. If you want to have a look at what the previous intakes have done, here are some links! But don't let these limit your creativity! Go build awesome apps!
