

Time	~ 2 hours
Learning Goals	<ul style="list-style-type: none">• Learn how to use AJAX in a Rails app

Treat this app as if it's for your startup. How will you want your users to see and use your app?

For this challenge, first [watch this Rails cast](#) on how to add jQuery and AJAX to your Rails app.

Next, read up about `remote: true` from the [documentation](#).

Now apply what you have learnt to the following scenario:

For the user form, when a user inputs an invalid the entry and submits the form, use AJAX to display an error message instead of using a redirect and displaying a flash message.

Research keywords: `ajax with rails`, `remote true rails 4`
