Time	~ 2 hours
Learning Goals	• Make your PairBnB code more readable!

Objectives

Refactor your PairBnb Code

Let's get help from our external friends https://github.com/railsbp/rails_best_practices. You have done it once when you deployed your app. If you haven't done so, it's time to install this gem! It will generate a report of your code and help you with some of the code refactoring.

Then, based on the specs you wrote yesterday, refactor the methods you tested. Try to make it easier to read like the examples you did in the previous challenge.
