|	
Description	jQuery, one of the most popular library for Javascript, can be used to jazz up your por
Time	~ 1.5 hours
Learning Goals	- Build a form using HTML. - Use jQuery for form validation.

Getting Started

Now that you have learnt about jQuery, **let's start writing some jQuery on your portfolio!**

There are several ways to start using jQuery on your web site. You can:

- Download the jQuery library from jQuery.com
- Include jQuery from a CDN

The jQuery library is a single JavaScript file, and you reference it with the HTML `<script>` tag (notice that the `<script>` tag should be inside the `<head>` section):

```
<head>

 <script src="path-to-your-jquery-file(either a CDN url or a local .js file)"></script>

</head>
```

What are the pros and cons of using a jQuery CDN vs hosting it locally?

Objectives

Apply a few jQuery functions to your portfolio. Here is a simple example to help get you started!
